BANGOR, MAINE

Annual Catalogue

We take pleasure in presenting to our patrons and friends our catalogue for 1912.

We offer our seeds with the full assurance that they are true and reliable, quality being always our first consideration, but at the same time we wish it particularly understood that we do not warrant them, for the ultimate success of a crop is dependent on so many contingencies that we cannot hold ourselves liable or responsible for failure. If the purchaser does not accept the seeds on these conditions, they must be returned at once.

In ordering goods please give your Name, Post Office and State in full, being particular to write your name very distinctly.

Remittances can be made by Post Office Money Orders, Bank Drafts, Express Orders or cash sent in Registered Letter.

Orders from unknown correspondents must be accompanied by a remittance or a satisfactory reference.

When ordering seeds by mail postage must always be added at the rate of eight cents per pound, in quantities of one-fourth pound and upwards. Seeds by packet and ounce will be mailed without extra charge.

In shipping we make no charge for delivery to railroads or express companies.

We are thankful for the generous patronage heretofore given and intend to continue to merit the same by exercising the utmost care and fidelity in promoting the interests of our customers.

R. B. DUNNING & CO.

LIBERAL REDUCTION TO CLUBS

Liberal reductions will be made to persons selecting packet seeds from our Catalogue, at the prices named, and will be forwarded, postage free, to any part of the United States.

This reduction is for packet seeds only. Seeds when ordered by the ounce, pound or quart will not be included.

Bangor = Maine

Selected Northern Grown Vegetabl: Seeds

Seeds sen't by mail or express as the purchaser may wish. When ordering to be sent by mail, add postage for Beans and Peas at the rate of 15 cents per quart, to Sweet Corn, 10 cents per quart, and to Flint or Feld Corn, 15 cents per quart to catalogue prices.

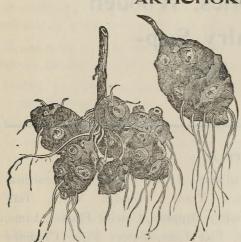

Bulk seeds by the pound, if ordered sent by mail, add 8 cents per pound for

postage.

Seeds in packets and ounces sent by mail free.

Beet Seed, Carrot Seed and Seed Peas are extremely short this season. We would recommend placing orders for these seeds early as we anticipate that the supply will be exhausted before the season is over.

ARTICHOKE-Jerusalem

From four to five bushels will seed an acre; they should be cut the same as potatoes, one eye on a piece being sufficient, planted in May, in rows three feet apart, and about eighteen inches in the rows, and covered about two inches deep.

They are the best hog food known, and are attracting much attention on account of their great fattening properties, and for milch cows, they excel any root grown for increasing the flow of milk, and make it much richer.

An acre will keep from 20 to 30 hogs during the fall and winter months.

They are well adapted to any soil where corn or potatoes can be grown.

Jerusalem Artichoke. Tubers, per quart, 25 cents; per peck, \$1.00; per bushel, \$3.00.

ASPARAGUS

This is one of the first and finest spring relishes which comes to the table from the garden, and it really requires very little trouble in cultivation, since a bed once properly made and planted will last for years. The soil for the bed can hardly be made too rich, and the fertilizer should be well trenched-in to the depth of 2 feet or more. The roots should be planted as early in spring as the ground can be prepared, setting them a foot apart in rows 3 or 4 feet apart, with the crowns from 4 to 6 inches below the surface of the bed. Asparagus seed may be sown directly in the permanent bed and the plants thinned as they grow; or it may be sown elsewhere, and the seedlings transplanted the second year. An ounce of seed will sow 50 feet of drill,

and produce about 300 plants. Fair crops may be expected the third year.

Colossal. Widely cultivated; very large, deep green; tender Pkt. Oz. 1/41b. stalks of good flavor; the roots are vigorous and productive, 5 .10 .20

BEANS-Dwarf or Bush

Improved Golden Wax Beans

One quart is sufficient for one hundred feet of drill; two bushels for one acre in drills.

A succession of sowings can be made from the first week in May until July. Plant in drills about two inches deep, and from eighteen inches to two feet apart, according to the richness of the soil; the poorer the soil the closer they can be planted; the plants should be about three inches apart.

Beans ordered sent by mail are subject to an extra charge of 15 cents per quart and 8 cents per pint for postage. Pints furnished at quart rates.

BEANS-Pole or Running

One quart will plant one hundred hills, ten to twelve quarts to the acre.

These are more tender, and require rather more care in culture than the bush beans; they succeed best in sandy loam, which should be liberally enriched with short manure in the hills, which are formed, according to the variety, from three to four feet apart; from five to six seeds are planted in each hill, about two inches deep.

Beans ordered sent by mail are subject to an extra charge of 15c per quart for postage, pints furnished at quart rates.

Scarlet Runner. Very ornamental, free climber with Pkt. bright scarlet flowers.... .10 .30

White Dutch Runners. Large, white flowers; often planted with the scarlet variety; the effect

is very beautiful..... .10 .30 1.75 BEETS

One ounce to fifty feet of drill; six pounds to the acre.

The best results are obtained on a deep, rich, sandy loam. For early use sow as soon as the ground will admit, in drills fourteen inches apart, and thin to four inches; for the main crop sow the first week in May, and for winter use as late as June. The soil should be deeply manured and well cultivated. In lifting and storing the roots, care must be taken that they are not bruised.

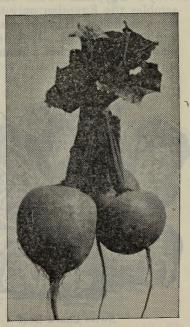

KENTUCKY WONDER or Old Homestead

A very prolific sort producing its pods in large clusters. Pods green, very long, often reaching nine or ten inches, nearly round when young and very crisp, of fine flavor and most excellent for snap beans. One of the best and most profitable beans for the market gardener, the pods being so showy and produced Qt. in great abundance....25

Early Jersey Lima. Of large size. Very tender and of delicious flavor. Very early. Out of a number of varieties that we have tried, we found this to be the most desirable sort

SUGAR BEETS and MANGEL WURZELS

Varieties Grown for Feeding Stock (Sown in May or Early in June), Six Pounds Per Acre.

Danish Sludstrup. This wonderful new mangel is of Danish origin and has repeatedly been awarded a first-class certificate by the Danish government on account of the larger vield per acre and the greater feeding value, per ton, over other well known standard varieties. It has a long, reddishyellow root, growing well above the ground, and on that account is very easily harvested. Tried with six standard, well-

Giant Yellow Intermediate

known varieties of Mangels by us last season, we found that the Sludstrup gave a far greater yield. We think this is the best Oz. 1/1b. Lb.

Mangel ever introduced...10 .25 .75 Giant Feeding Sugar. A cross of the Mammoth Red

Mangel and Improved Sugar Beet. Roots large, long and smooth, and of a beautiful light rose tint. Yields nearly as large a crop as the Mangels, and supplies a food of very much higher nutritive value. The roots grow partly out of the ground and can be harvested very easily Crop failed.

Lane's Improved Sugar. A well known variety; valuable for feeding to cattle.. .10 .20 .60

Giant Yellow Intermediate. This variety grows more than half above the ground, and is a russet, yellow color. The root is ovoid, intermediate between the long and globe varieties. Flesh white, firm and sweet, much liked by cat-Produces enormous crops and a good keeper.. .10 .20 .60

Yellow Globe Mangel Wurzel. Roots of large size, and globu- oz	¼1b.	Lb.
lar form; very productive	.20	.60
Improved Mammoth Long Red Mangel Wurzel. A variety pro-		
ducing roots of mammoth size	.20	.60
Golden Tankard. A half long variety of a bright yellow color, .10	.20	.65
Norbiton Giant Mangel Wurzel. Extra fine Long Red, very		.,
large	.20	.60
Giant Red Eckendoff. A very popular Danish variety of mangel		
of a square chunky type. It is very valuable, net only for its		
high feeding value, but also for its phenomenal yields. As		
the greater portion of the root grows above the surface of the		
soil, they are easily harvested, and their chunkiness prevents		
their breaking in handling. We consider this one of the best		
varieties	.20	.70
Giant Yellow Eckendoff. Very similar to the Giant Red		
Eckendoff except it is of a rich vellow color	20	70

CABBAGE

One ounce will produce about three thousand plants.

The Cabbage is one of the most important vegetables, and some of its varieties universally cultivated. The ground must be highly manured, deeply dug or plowed, and thoroughly worked, to insure good, full sized heads. A heavy, moist and fresh loam is the most suitable. The early sorts should be sown very early in the spring, in hotbeds, or later in the open ground.

CARROTS

3/1b .85

One ounce to one hundred feet of drill; three to four pounds to the acre.

Ox Heart Carrots

Carrots require a very finely pulverized soil to grow them to perfection. A good, light and well enriched sandy loam is the best for this crop. For field culture, sow in drills three to three and one half feet apart so as to cultivate by horse. Market gardeners sow in drills about eighteen inches apart, and cultivate by hand. For early crops cover one-half an inch deep, and thin to six inches apart, in the rows; for late, cover three-fourths of an inch deep, and thin to four inches.

Early French Forcing. The earliest variety in cultivation and the best suited for forcing and early market gardening. Tops, small and divided The roots are a reddish orange color and nearly round. When fully ma-

tured, they are about two inches in Pkt. Oz. 1/1b. Lb. diameter 5 .20 .60 2.00

Golden Self-Bleaching Celery

Boston Market. A favorite variety, remarkable for its tender, crisp, succulent stems, keeps well Henderson's White Plume. Crisp, solid and possessing a sweet, nutty flavor; requires very little labor in bleaching

Golden Self-Bleaching.

A self-bleaching early golden colored variety that is very popular...

CORN-Sweet

One quart to two hundred hills, ten quarts to an acre.

The Sweet or Sugar varieties, being liable to rot in cold or wet ground, should not be planted before the middle of May and for a succession continue planting every two weeks, until July, in rich, well manured ground, in hills three feet apart, each way, covering about half an inch and thin out to three plants to a hill, or plant in rows four feet apart, and to stand eight inches

which many sorts will fail. Heads Pkt. Oz. large, solid, crisp and tender..... 5 1.00

CELERY

One ounce of seed produces about four thousand plants.

To have celery early, it should be sown in a hotbed quite early in the spring, and when three inches high plant out in a well prepared bed, which must be covered in frosty weather. For the principal crop, sow early in spring, very shallow in the seedbed, and when the plants are about six inches high, transplant them about six inches apart into trenches, for blanching. Dig the trenches four feet apart, a foot wide and ten inches deep. Fill in five or six inches of well rotted manure, and mix thoroughly, half a spade deep, with the earth at the bottom. The tops of the plants should be shortened before they are set. Earth up to blanch, three or four times during their growth, taking care that no earth falls in the center of the plants.

Pkt. Oz. 5 .20

5 .20

Improved Thick-Leaved Dandelion

DANDELION

One ounce to one hundred ft. of drill. The Dandelion resembles Endive, and affords one of the earliest, as well as one of the most healthful, of spring greens. Sow as early as the weather will permit, in good, well-enriched soil, in rows twelve inches apart, covering seed one-fourth of an inch deep, the earth firmly pressed over the seed.

Pkt. Oz. ¼lb.

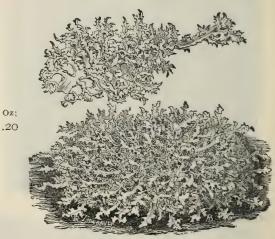

ENDIVE

One ounce to one hundred and fifty feet of drill.

Endive may be grown at any season of the year, but is more generally used late in the fall. Sow the seed during May or June, in drills, fourteen inches apart, and when well established, thin to one foot apart. When nearly full grown, tie the outer leaves together over the center in order to blanch the heart of the plant.

Green Curled. This is the hardiest variety, and very desirable for the home and market garden. The deep, green leaves are beautifully cut and curled, easily blanched, and become very crisp, tender Pkt. and fine flavored...... 5

White Curled. By far the most beautiful variety. Plants moderately dense, with divided leaves, which are coarser and less tender than those of the Green Curled; but even the outer leaves are very light colored, frequently

Green Curled Endive

white, so that the plant is very attractive and always brings the high-Pkt. Oz. est price on the market..... 5.20

LEEK

Belongs to the onion family and by some preferred to that vegetable. Sow the seeds and care for the young plants same as for onions, but they need a little more room in order to develop fully. When the young plants are about the size of a goosequill, transplant to a prepared bed in rows one foot apart and four or five inches in the row. Set the roots deep and draw the earth to them when cultivating, so that they may be well blanched by the time they are fit for use.

London Flag Leek

London Flag. It is the variety more cultivated in this country than any other. It is hardy and Pkt. Oz. 1/41b. of good quality..... 5 .20 .60

LETTUCE

One ounce to one hundred and twenty feet of

Lettuce thrives best in rich, moist ground. Sow the seed in hot-beds in February or March, and transplant into a sheltered border with a southern exposure. For successive crops, sowings may be made in the open ground as early as the spring opens, and continuing until July.

Lettuce should always be transplanted in order

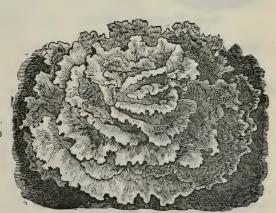

to make it head well.

Early Tennisball. White seeded. Extensively grown for forc-			
ing and heading under glass, heads firm and good size; very	Pkt.	Oz.	¼1b.

MELON-Musk

Citron Preserving Melon

One ounce for sixty hills; two to three pounds for an acre.

Melons thrive best in a moderately enriched light soil; the hills should be six feet apart each way. After all danger of frost is past, plant twelve or fifteen seeds in each hill, and when well up, thin out to three or four plants in each hill.

Nutmeg. Named from its shape; flesh green and Pkt. Oz. 1/41b-sweet 5 .10 .25

MUSTARD

Sow thickly in rows at different times from May to July, and cut when about two inches high. Used as a salad or cut and boiled for greens. The seed is used for flavoring pickles, etc.

White London. The leaves are light green, mild and tender Pkt. Oz. 11b. when young; seed light yellow...... 5 .10 .25

Yellow Globe Danvers Onion

ONION

One ounce to one hundred feet of drill:

five pounds to the acre.

No vegetable is more extensively known and cultivated than the Onion. A good crop is impossible unless the soil is very rich and kept clean. Use well-rotted manure freely, and get the crop in as early as possible in spring, no matter if the weather is cold and unpleasant. Sow in drills one foot apart, and cover about onethird of an inch, treading or rolling, after sowing, so that the hot, dry atmosphere may not dry up and destroy the sprouting seed.

Large Red Wethersfield.

Large size, productive and Pkt. Oz. 1/1b. Lb. a good keeper..... 5 .20 .60 2.00

Extra Early Red Globe. A very early variety of

medium size and deep red color; an abundant producer and of good form and flavor, keeping well 5 .20 .60 2.00

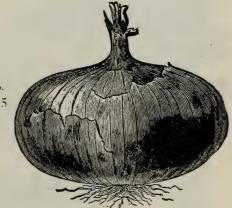

Yellow Globe Danvers.—Extra choice. Maine grown seed. This is far superior to the western grown seed as it is much earlier and is better adapted to our climate. It is sure to produce a good crop. The most profitable variety for the market gardener..... 5 .20 .75 2.50

Yellow Globe Danvers. The most profitable variety to raise, very productive, a good keeper, of mild flavor, and always meets with ready sale..... 5 .15 .50 I.75

American Silver Skin. Flavor mild and pleasant. Skin silver white. Handsome in appearance. Highly esteemed for pickling when

young; also for market Pkt. Oz. 1/1b. Lb. in early winter..... 5 .20 .60 2.25

tract marked attention. The variety is without doubt the largest onion grown, samples under special culture, some-Pkt. Oz. 1/1b. Lb. times weighing five pounds...... 5. 20 .75 2.25

Onion Sets should be planted near the surface as early in the spring as the ground will permit, in drills about twelve inches apart and four inches in the rows. They produce a very early and profitable crop.

Onion Sets ordered by mail are subject to an extra charge of ten cents a quart for postage.

For larger quantities prices will be given on application.

PARSLEY

One ounce to one hundred and fifty feet of drill.

Parsley requires rich, mellow soil; sow thickly in drills, one foot apart, and half an inch deep. As the seed germinates slowly, it is best to soak it for a few hours in tepid water before sowing. For winter use, protect it in a glass frame or light cellar.

PARSNIP

One ounce for two hundred feet of drill; five pounds to the acre.

Double Curled Parsley

Abbott's Improved Parsnip

Sow as early in the spring as the weather will admit, in drills 15 inches apart, covering half an inch deep, when well up thin out to five or six inches apart in the rows. Unlike carrots, they are improved by frost, and it is usual to take up in the fall a certain quantity for winter use, leaving the rest in the ground until spring, to be dug as required.

Abbott's Improved, or Long Smooth.

PEAS

NOTICE. Owing to the unfavorable climatic conditions throughout all the pea growing sections last season, there is the oreatest shortage in seed peas ever known, not being enough to supply the ordinary demand.

We would recommend when sending us your orders to advise us to substitute some other variety, in case we are sold out of variety ordered.

One quart to seventy-five feet of drill; two to three bushels to the acre. Peas for an early crop should be sown as soon as the ground is in working condition. The soil for their reception should be light, dry and well sheltered. Mild manure, such as leaf mould, has a beneficial effect; but for many of the varieties, the soil cannot be too rich. For general crop the ground should be well manured the previous year, which causes them to yield more abundantly. When grown as a market crop, peas are never staked, and are sown in single rows, two or three inches deep, and from two to three feet apart, according to the variety or strength of the soil. When grown in small quantities for private use, they are generally sown in double rows, six or eight inches apart, and the tall varieties staked up by brush.

Peas ordered sent by mail are subject to an extra charge of fifteen cents per quart and eight cents per pint for postage. Pints furnished at quart rates.

EXTRA EARLY VARIETIES

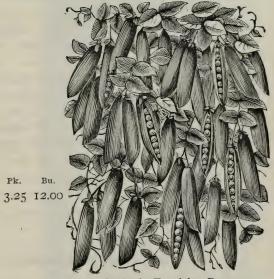

Sutton's Excelsior. A dwarf, early, wrinkled variety, height about 15 inches, pods large and well filled; a very heavy yielder and of delicious In habit and flavor. growth it resembles the Nott's Excelsior, but is more prolific and has larger pods. This is without doubt the best early, dwarf pea on the Qt.

Early Morn. A new variety of extra early, large podded peas. Claimed by the grower that it is from 4 to 6 days earlier than the Gradus or

Thomas Laxton Peas, with larger pods and a better cropper. That it is the earliest, large, wrinkled pea in cultivation. Vines grow from three to three and one-half feet high and are well filled with the immense pods. The peas are of excellent quality and delicious flavor

Gradus or Prosperity. A new, very large, extra early variety of wrinkled pea. The most desirable sort for the home and early market garden, large podded and of splendid quality. The vines grow about three feet high and are vigorous and hardy. The immense pods are as large as those of the Telephone, uniformly well shaped and handsome, and more attractive than those of other extra early varieties. The peas are very large, of splendid

Thomas Laxton. A new, early wrinkled variety of great merit. Vine three to three and one-half feet high, similar to that of Gradus, but darker in color, hardier and

Bell Pepper

PEPPER

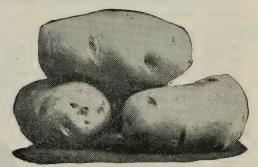

One ounce will produce fifteen hundred plants.

Grown largely for pickles. Sow in the hotbed early in April, and transplant into the open ground when the weather is favorable. The plants should be set in warm, mellow soil, in rows eighteen inches apart. The seed may also be sown in the open ground, when danger from frost is past, and the soil is dry and warm. Cultivate in the usual manner and the crop will be fit for use early in September.

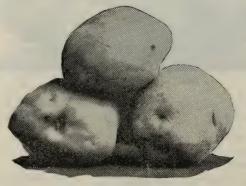

Large Bell. Large and of Pkt. Oz. mild flavor 5 .30

SEED POTATOES

Early Dew Drop. A very early variety and a very heavy cropper for an early potato. The tubers are snow white with very smooth, velvety skin and shallow eyes. No potato can surpass it in uniform and handsome appearance. They are very fine grained, white as flour and of splendid flavor.

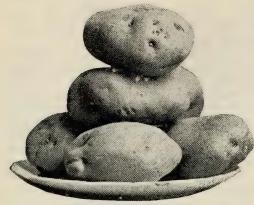

Early Dew Drop Potatoes

Irish Cobbler Potatoes

Irish Cobbler. We have found this potato to be one of the most reliable, extra early potatoes. In ripening it seems to be more uniform than any other sort. Every hill seems to ripen at the same time. The potatoes in form are oval and round. They grow very smooth, cream white, with few and shallow eyes. The quality for early table use is not excelled by any early variety. It keeps perfectly through the winter until planting time in the spring and it is never out of season for the

Harmony Beauty Potatoes All grown in one hill, weight 5 3=4 lbs.

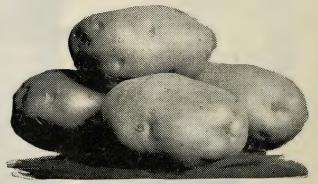

Harmony Beauty. This potato originated from the seed of a potato ball in Somerset county. Maine.

It is the favorite market potato of Bangor, having the preference over all other varieties wherever once used, and conceded by growers and consumers to be the best potato grown. It always brings a better price than any other in our market. It is a prolific cropper and remarkably free from rot, and about two weeks earlier than the Early Rose.

In appearance it has a russet, pinkish skin, a little lighter in color than the Early Rose, and is of more oval shape. Pk. Bu. 165 lbs.

Early Rose. The original Early Rose Potato, which was so popular and grown so extensively for a great many years in New England. After several years' trials, we have at last got what we consider to be absolutely pure stock. In our trials last year, we found that the yield was equal to its yield of former years. It was one of the very best yielding,

Gold Coin. A very hardy, all around general crop potato. White skinned with slight russety appearance, flesh white and mealy. In form it is very regular, of a round, oval shape. As a table potato it cannot be excelled. Its yielding qualities exceptionally large, being one of the heaviest

Gold Coin Potatoes

croppers we have ever grown. We consider this potato to Pk. Bu. 165 lbs. be the best all around potato for general crop in cultivation....50 1.75 4.65

Green Mountain. A late variety of flat, oval form; white skinned, very smooth and handsome. One of the best yielders, free from blight, and rot, keeps well, and is never out of season for the table.....

Mills' Pride. A new variety of potato grown by us for the first time last season. It has a white skin; very white flesh and is of oval, flat form. An immense cropper giving us the biggest yield last season of any potato we have ever grown. From seven bushels of seed planted on a little less than half an acre, rows three feet apart and hills twelve inches apart in the row, we harvested two hundred and four bushels of selected seed potatoes, with between twenty-five and thirty bushels of small potatoes and culls that were not fit to put into seed stock. It is a very vigorous grower with large, Pk. Bu. 165 lbs.

Sugar Pumpkin

PUMPKIN

One pound will plant two hundred and fifty hills. Chiefly used for agricultural purposes. Same cultivation as for cucumbers and melons.

A fall and winter variety, very popular in the Boston market; of oval form; skin thin; when ripe, bright orange; an excellent keeper and of superior quality 5 .10 .25 .75 Early Prolific Marrow. Earlier than the Boston Marrow. Very productive and grows to weigh from seven to twenty pounds. Its color is most attractive, a brilliant orange

red. Quality excellent when mature, and a good keeper, 5 .10 .25 .75 Hubbard. One of the most desirable varieties in cultivation; color, dark green; flesh, bright orange-yellow; fine

grained, very dry, sweet and rich flavored; keeps per- Pkt. Oz. 1/1b. Lb. fectly good throughout the winter.....

Warted Hubbard. An improvement over the old-fashioned Hubbard, same shape, large size, dark green, almost black, distinguished by a dense covering of knots which justifies the name of "warted." Very thick flesh, first-

class quality and a Pkt. Oz. 1/1b. Lb. good keeper 5 .10 .30 .90

Warted Hubbard

Delicious Squash

Delicious. A new variety of winter squash, one of the best ever introduced. Color of skin is green, with an occasional blue specimen. About the same size as the Hubbard. Flesh very thick and of a dark orange color, very fine grain, exceedingly rich and of elegant flavor. It can be used for either fall or winter use, but does not acquire its best qualities until winter. It is without question the sweetest and richest flavored squash grown. Per pkt. 5 cents, per oz. 10 cents, per 1/4-1b. 30 cents, per 1b. \$1.00.

SUNFLOWER

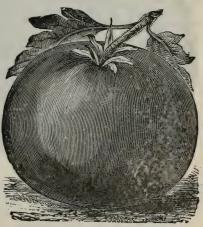

Large Russian. Per Pound, 15 cents

TOBACCO SEED

Connecticut Seed Leaf. Best adapted to the climate of the northern states, as it is more hardy and endures the cold Pkt. Oz. 1/1b. better than the tender varieties grown south........... 5 .30 I.00

TOMATO

One ounce will produce fifteen hundred plants. This vegetable is one of the most important of all garden products. They thrive best in a warm, light, rich soil. For early plants, sow about the first week in March in a hotbed; or in boxes or pots in a warm window. When the plants are about two inches high, set out in boxes. three inches deep, four inches apart, in the same temperature, or pot singly. If again transplanted before setting out, the plants will be still more stocky. Set out in the open ground about the first of June, four feet apart each way, using a shovelful of rotted manure in each hill. Keep well sheltered and watered until they are established, after which let the fruit have plenty of sun.

without hard core and not subject to rot. A great yielder, 5 .25 .75

TURNIP

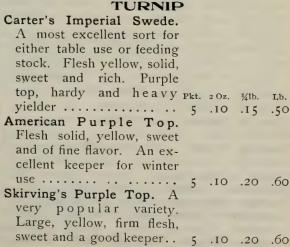

One ounce for one hundred and fifty feet of drill; one to two pounds in drills for an acre.

Turnips do best in highly enriched light, sandy or gravelly soil; sow the earliest varieties as soon as the ground can be worked in the spring, in drills twelve to eighteen inches apart. For a continuous supply through the season, sowings should be made every two weeks until the last of July; from which time until the middle of August the principal sowings are made for the fall and winter use. Swedish or Ruta Baga Turnips are largely grown for a farm crop, as well as for the table; make sowings from the tenth of June until the first of July, in drills two to three feet apart, and the plants when well up should be thinned to ten inches apart. To keep the roots fresh during the winter they may be placed in a cool, dry cellar, buried in dry sand.

like in form, growing about half out of the ground. An exceptional heavy yielder of very rapid growth and is very popular for field culture for feeding stock. As a table variety it has a very delicate flavor but should be

green at the top, and is carrot

Single Hyacinth

BULBS

FOR AUTUMN PLANTING
Ready for Shipment about September First

Garden Culture. Bulbs may be planted from the first of October up to the time the ground freezes, in any good, well-drained, garden soil, which has previously been well enriched and dug to a depth of from 12 to 15 inches. Before the ground freezes, cover the beds with material such as leaves, straw, boughs, etc., to a depth of 4 inches. Do not uncover too early in the spring.

HYACINTHS

One of the most popular bulbs for effective beds outdoors, or grown in the house in pots. Bulbs should be set 6 inches apart and 6 inches deep.

Single Varieties.

Red, Rose, White, Light Blue, Dark Blue. Prices in separate colors, 8 cents each; 80 cents per dozen; \$6.50 per 100.

Double Varieties.

Red, Rose, White, Light Blue, Dark Blue. Prices in separate colors, 8 cents each; 80 cents per dozen; \$6.50 per 100.

TULIPS

No other flower excels the Tulip in beauty of form, brilliancy of color, effective bedding and gorgeous show. They are equally as desirable for bedding, or pot culture indoors. Bulbs should be set 6 inches apart and 4½ inches deep.

Single Tulips. Extra fine mixed colors. Price, 3 cents each; 25 cents per dozen; \$1.75 per 100.

Double Tulips. Extra fine mixed colors. Price, 3 cents each; 30 cents per dozen; \$2.co per 100.

NARCISSUS

Popularly called "Jonquils" or "Daffodils." Next to the Tulip the Narcissus is the most popular spring flowering bulb. They will grow in any ordinary garden soil and in almost any situation. Very desirable for pot culture as well as outdoor culture. For outdoor culture bulbs should be planted 4 to 5 inches deep and 4 to 6 inches apart.

Poeticus. Single white. Price, 3 cts. each; 25 cts. per doz.; \$1.50 per 100. Emperor. Single yellow. Price, 5 cts. each; 45 cts. per doz.; \$3.00 per 100. Poeticus. Double white. Price, 3 cts. each; 30 cts. per doz.; \$1.60 per 100. Von Sion. Double yellow. Price, 5 cts. each; 50 cts. per doz.; \$3.25 per 100.

CROCUSES

One of the first to blossom in the spring, lifting its head almost before the snow has disappeared. Blooming at a time when the ground is destitute of

foliage, it is a welcome visitor. The crocus succeeds well when grown in pots for indoor culture, as well as for borders and beds for outdoor culture; may also be grown in water with a little sand in any shallow dish or plate.

Plant in the open ground 2 inches deep and 2 inches apart.

Mont Blanc. Pure white.

Sir Walter Scott. White, penciled lilac.....

Purpurea Grandiflora. Dark blue.

Albion. Dark violet, striped white.

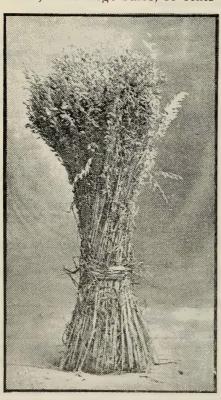

Cloth of Gold. Golden yellow, striped maroon

Price 2 cents each; 15 cents per dozen; \$1.00 per 100.

CHINESE SACRED LILY

The flowers are of a satiny white color with very fragrant golden yellow cups. Usually used for indoor culture, grown in bowls or dishes of water. Put an inch or two of sand or gravel in the dish in which they are to be grown, set the bulbs on this and put enough gravel or shells around them to keep them from falling over; fill the dish with water and keep in any ordinary living room.

Price, extra large bulbs, 10 cents each; \$1.00 per dozen.

White Victor Oats

WHITE VICTOR OATS

This is one of the most productive varieties of oats ever introduced. The straw is very stiff holding the heavy head up well. It is early and the grains are large, plump and heavy. Plant grows to medium height, of vigorous growth, stools out well and yields an immense crop. They are pure white in color and are entirely free from rust and smut.

A change of seed oats is very necessary to a good crop. In making the change why not get seed of this choice new variety that will insure you an extra large crop.

Price: Postpaid, tb., 20 cts.; 3 tbs., 50 cts. By Express or Freight, pk., 40 cts.; bu., \$1.20; 10 bu. lots, \$1.10 per bu. In lots of one bushel or over, there will be a charge of 20 cts. for bags, capable of holding 2½ bushels.

EARLY PEARL OATS

This is a grand, good oat, the result of years of careful growth and selection. In appearance they are white, medium size and very full meated. Heads are large and straw stout, not inclined to lodge, and are free from

rust and smut, and yields an immense crop. This oat took the Diploma for the Sweepstake Prize given by the Maine Corn and Fruit Show held in Portland, Me., in November, 1911. Also the Sweepstake and First and Second Prizes given by the Maine Seed Improvement Association at meeting held in Waterville for season of 1911.

In both instances there were a great many competitors for these prizes. Price: Postpaid, tb., 20 cts.; 3 tbs., 50 cts. By Express or Freight, pk., 40 cts.; bu., \$1.20; 10 bu. lots, \$1.10 per bu. In lots of one bushel or over, there will be a charge of 20 cts. for bags; bags capable of holding 2½ bushels.

EXTRA SELECTED FARM SEEDS

At market prices at time order is received. All inquireis for quotations will be promptly answered.

Orchard Grass

Kentucky Blue Grass. An excellent variety for pasture. Also valuable for lawns when mixed with other grasses; 14 lbs. to the bushel.

Awnless Brome Grass—(Bromus Inermis)

An erect growing perennial that attains a height of from three to five feet. It is especially recommended for dry and arid soils where the more delicate grasses will not grow. Its remarkable drought resisting qualities make it very valuable for dry situations, while its extreme hardiness enables it to withstand our coldest winters

GRASS SEEDS

Timothy or Herd's Grass. The best grass for hay; 45 lbs. to the bushel. Fancy Red Top. Clear seed. A valuable grass and extensively cultivated; 40 lbs. to the measured bushel.

Rhode Island Bent. Very fine lawn grass; 10 lbs. to the bushel.

Orchard Grass. Valuable on all dry soils, very valuable as a pasture grass: 14 fbs. to the bushel.

grass; 14 fbs. to the bushel.

Canada Blue Grass. A very hardy variety of Blue Grass. Excellent for pasture and especially adapted to dry, sandy, thin soils. Does not make as fine a sod as the Kentucky Blue Grass, but will stand rougher usage; 14 fbs. to the bushel.

without serious injury. The rootstalks of this variety spread rapidly under ground, sending up new shoots, and thus form a close, dense sod. On this account it should not be sown, except where a permanent grass crop is desired; 20 ibs. to the bushel.

MILLETS

Millets should be sown in June and July, and are annual forage plants of thick growth, valuable for green fodder or hay; maturing in fifty to seventy-five days from the time the seed germinates, producing an abundant yield of forage, relished by all kinds of stock. They must be cut while in blossom to make good hay. At market prices at time order is received. All inquiries for quotations will be promptly answered.

Hungarian Grass. Early; grows two to three feet high; abundant foliage; withstands drought and yields well on light soils; 48 fbs. to the bushel.

Golden Millet. Requires a dry, light, rich soil, and grows two and a half to four feet high, with a fine bulk of stalks and leaves, and is excellent for foraging; 48 fbs. to the bushel.

New Siberian Millet. A new and wonderfully productive forage plant from Russia, which has given excellent results in the United States. It is extremely hardy and about two weeks earlier than German Millet,

Hungarian Grass

growing about four feet in height. Its stooling properties are remarkable, as high as 41 stalks having been grown from a single seed. Hay and fodder are very nutritious and much liked by all kinds of stock. Sow in June and July, one peck to the acre; 48 fbs. to the bushel.

CLOVERS

Prices subject to market changes.

There are no plants so valuable for fertilizers as the clovers. They have the faculty for absorbing nitrogen from the air, and also of rendering available much of the inert plant food of the soil. Their long, powerful tap roots penetrate to a great depth, loosen the soil, admit air, and by their decay add immensely to the fertility of the soil. The seed may be sown in fall or spring; the best results will come from sowing in the spring, and is often sown on the late snows of April.

Alfalfa

Medium Red Clover. Pea Vine or Mammoth Clover. Alsike Clover. White Dutch Clover. Valuable for pasture and for lawns.

Scarlet or Crimson Clover. This variety is an annual clover and should be sown each year, is fine for soiling cattle; has a beautiful crimson blossom. Alfalfa or Lucerne Clover. Very productive; requires deep soil.

DWARF ESSEX RAPE

This is very valuable for sheep pasture. It can be sown in May, and will be ready for pasturing in July or August; or it may be sown in June or even up to the middle of July, and yet furnish, under reasonably favorable circumstances, a large amount of pasture and fodder. It is very suitable for sowing on land that an early crop of potatoes has been taken off. In drills, about four pounds to the acre; broadcast, eight pounds to the acre. Pound, 12 cts.; 10 pounds for \$1.00.

COW OR SOUTHERN PEAS

The great soil improver. Green crops plowed under are one of the best and cheapest ways of improving the soil. For this purpose the Cow Peas are the most popular, especially for medium and light soil. They should

Soja or Soy Beans

Sand, or Winter Vetch

be sown the last of May or in June, at the rate of one and one-half bushels to the acre, and plowed under as soon as they have attained their growth. There is no surer or cheaper means of improving poor soil than by sowing Cow Peas. In its capacity as a nitrogen gatherer, its growth largely enables the farmer to dispense with the use of nitrogen or ammoniated fertilizers.

Cow Peas are also valuable as a forage crop. Black Eye. Seed creamy white, with a large black eye. A prolific vine grower.

Whip-poor-will. Seeds are good size, speckled brown in color. A prolific bunch growing variety.

At market prices time order is received.

SOJA OR SOY BEANS

Very valuable for fertilizing and enriching the soil: also used for pasturing, feeding as green fodder, and for silo purposes. Sow broadcast in May or June, at the rate of one bushel to the acre, or they may be planted in drills three feet apart and one foot between plants.

At market prices time order is received.

SAND, or WINTER VETCH

One of the pea vine class of plants. Better than other fodder crops on poor, dry, sandy soil, while in good soil it makes a rank growth of four to five feet. Perfectly hardy all over the United States, stands drought well and remains green all winter. It is the earliest of all spring fodder crops. Sow for spring use in August with ½ bushel of winter rye or oats, or in spring with ½ bushel of oats, rye or barley. It is exceedingly nutritious, eaten with relish, and may be fed with safety to all kinds of stock. Sow at the rate of one bushel per acre.

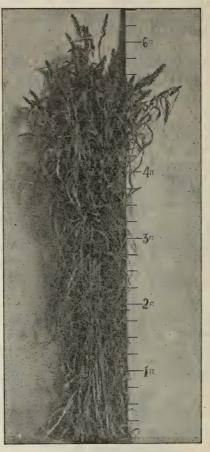

At market prices time order is received. All inquiries for quotations will be promptly answered.

JAPANESE BARNYARD MILLET

This wonderful and valuable new forage plant was introduced into this

White Hulless Barley

Japanese Barnyard Millet

country by Prof. Brooks, of the Massachusetts Agricultural Experiment Station. It has proven an enormous yielder in all sections of the United States; hay and fodder of most excellent quality on any soil, yielding 8 to 10 tons per acre and growing from 5 to 7 feet in height.

Cattle and horses eat it greedily.

Sow in May and June broadcast, 10 to 15 lbs. per acre (it stools remarkably), or in drills, 8 lbs. per acre.

Price, per pound, 7 cts.

Per 16 pounds, \$1.00.

If sent by mail, add 8 cents per pound for postage.

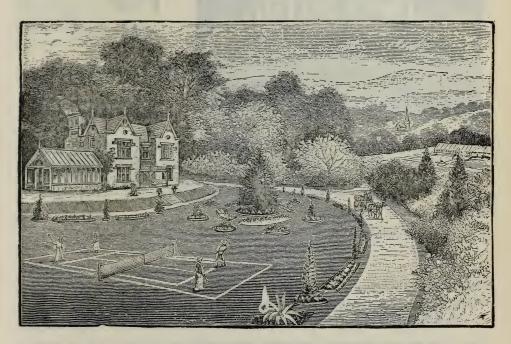

GRAINS

Prices subject to market changes. All inquiries for quotations will be promptly answered.

Wheat, Spring Rye, Winter Rye, Barley, Oats, Silver Hull Buckwheat, Common Buckwheat, Indian Wheat or Rough Hulled Buckwheat, White Hulless Barley.

All our grains are selected expressly for seed, and are strictly pure and true.

All inquiries for quotations for grass seeds, grains, etc., will be promptly answered and samples sent by mail when desired.

Dunning's Lawn Grass Seed

This is a mixture of the different varieties of grass seed, which is best suited to fais climate for lawns, grass plots, cemetery lots, etc., and selected with a view of suiting all soils and situations and whether used in pastures or lawns, has invariably produced the best results. It must be remembered, however, that much of the fine appearance of our lawns depends upon regularity in mowing. If they are left too long in spring before the operation is begun, or if allowed to grow strong in summer, and, more especially, if not closely mown at the latest period in autumn, they become coarse, the stronger grass overgrowing the weaker and the best, the smoothness of the surface being destroyed, and ultimately the whole becoming patchy and unsightly. All lawns should also be regularly rolled and, unless the subsoil be a porous, alluvial gravel, should also be thoroughly drained at their formation A drain should be carried along at the bottom of each terrace slope, so that they may at all times be comfortable to walk upon. The seed may be sown in spring or fall, but, if sown in hot weather, a slight sowing of oats, which vegetates quickly among the grass, will serve to protect the springing grass. For forming new lawns, four bushels are required per acre, or about one quart to each square rod of land, which should be regularly and evenly distributed.

A liberal quantity of seed should always be used to insure the best results. Per pound, 30 cents. If sent by mail, add eight cents per pound for postage.

Per bushel of 20 lbs., by Freight or Express, \$5.50.

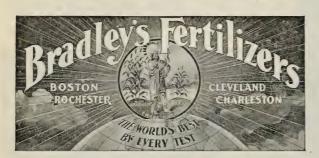

English Lawn Fertilizer

An Odorless Chemical Fertilizer For Lawns, Flower Beds and Kitchen Gardens.

This is a high-grade chemical fertilizer, especially prepared to promote the vigorous and healthy growth of luxuriant grass, enabling it to withstand rough usage and the protracted neat of summer.

Being free from weed seeds, and odorless, it is far superior to unsightly and strong smelling stable dressing for use on lawns and tennis courts.

Ten pound bags for 1.000 square feet	\$.50
Twenty-five pound bags for 2,500 square feet	\$1.00
Fifty pound bags for 5,000 square feet	\$1.50
One hundred pound bags for ¼ acre	\$2.50

For All General Farming

are, without doubt, the best fertilizers in the world for producing the largest possible crops of Grass, Grain and Vegetables in the shortest time. The Bradley Fertilizer Co. manufacture fertilizers of all Grades and for all Crops and being the largest manufacturers in the world their facilities for furnishing all kinds of fertilizers and agricultural chemicals at the lowest prices are absolutely unequaled.

A full stock of the following standard fertilizers constantly on hand:

Bradley's X L Superphosphate

Bradley's Potato Fertilizer

Bradley's Potato Manure

Bradley's Corn Phosphate

Bradley's Eureka Seeding=Down Manure Bradley's Complete Manure with 10% Potash Bradley's Complete Manure for Potatoes and Vegetables

Send to us for finely illustrated pamphlets, describing all of their brands, and let us quote you prices on these unequaled fertilizers, before purchasing elsewhere.

Agricultural Lime

Especially prepared for agricultural purposes, and, being finely ground, it can be used in any broadcast sower.

Many plants, such as beets, spinaca, lettuce, onions, parsnips, cabbages, cucumbers, peas, beans, turnips, carrots, corn and all grains, show a decided increase and are greatly benefited by the use of lime, as it corrects all acidity of the soil, sweetening it, and freeing it from impurities.

Lime properly applied at certain intervals will be found a most perfect renovator, one that can be relied upon. For the ordinary piece of land that requires lime it will be found that once in the rotation of crops, or, say once in four years, is as often as lime should be applied. It will hold the land in its proper condition for that length of time.

Put up in 100-pound bags,

Sterlingworth Poultry Charcoal

PREPARED ESPECIALLY FOR POULTRYMEN

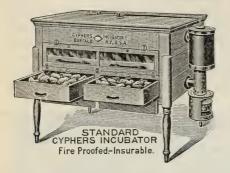

We have had this Charcoal put up for us to meet the demand for an evenly graded charcoal, free from dust and useless dirt, and offer it as the best Poultry Charcoal manufactured.

This Charcoal should not be confounded with the ordinary commercial charcoal which is not evenly graded, generally contains large quantities of dust and is not always free from dangerous poisons.

Charcoal aids digestion, promotes health, and is generally corrective of many of the poultry ills to which fowls are heir. A little charcoal goes a long way and is worth its weight in gold. No poultryman can afford to be without it. It is put up in three sizes—Fine: For Brooder Chicks, Dry Chick Mixtures and Mash Foods. Medium: For Half Grown Fowls, Pigeons, etc. Coarse: For Full Grown Fowls, Geese, Turkeys, etc.

Prices: Packed in two-pound cartons printed with directions for feeding, 15 cents each. Put up in 50-pound sacks, \$1.00 each.

Standard Cyphers Insurable Incubators and Brooders

FOR 1912 we offer our customers the Cyphers Company's complete line of incubators and brooders—THE BEST ON THE MARKET. For years the Cyphers Incubator has been consistently improved, always MAINTAINING ITS LEADERSHIP, until today it represents all that is most EFFICIENT. CGNVENIENT and RELIABLE in incubator construction.

TO OWN A CYPHERS is to have an incubator that stands FIRST, not only because it has affixed to it the fire insurance label granted by the National Board of Fire Underwriters and

bears a world-wide reputation, but because of the WELL ESTABLISHED FACT that it is THE BEST HATCHER of large, vigorous, livable chicks.

THE PRINCIPLES OF CONSTRUCTION that have made Cyphers Incubators "the world's standard hatchers" for the last twelve to fifteen years REMAIN UNCHANGED in the 1912 pattern. Their patented features, their entire freedom from the bothers, disappointments and losses common to the "Cheap" or "Bargain" incubator, make these high-class machines the best for you to own FIRST, LAST AND ALL THE TIME.

CYPHERS INCUBATORS have now been on the market FIFTEEN YEARS and today are used by more Government Experiment Stations, on more large, practical poultry plants, on more successful duck and egg farms and by a larger number of foremost poultry breeders THAN ALL OTHER MAKES COMBINED.

CYPHERS BROODERS FOR 1912

Fire=Proofed and Insurable

Complete line for outdoor and indoor use. Employ top-heat and are self-ventilating and self-regulating. Are built on colony house plan (except indoor type); are substantially made, are fire-proofed, and every one bears the fire insurance underwriters' "Inspected Brooder" label.

THE CYPHERS STYLE A 1912 OUTDOOR BROODER

This was formerly known as the Storm King, is better made than its predecessor and is recommended for use of poultry raisers who feel that they do not wish to invest in the larger sized and more costly three-apartment outdoor brooders. This brooder is equipped with the Cyphers Fire-Proof Brooder Heater and Standard Adaptable Hover. It employs top-heat exclusively, thus giving the chicks free use of all space underneath the hover. It is self-ventilating and self-regulating.

CYPHERS STYLE B 1912 OUTDOOR BROODER

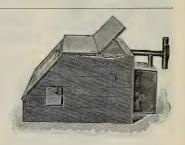

This was formerly known as Style A. Is a three-apartment brooder, and has the same style of heater as the Style A 1912 Brooder and is twice as large.
Price: Style B 1912 Outdoor Brooder,

\$16.50.

CYPHERS STYLE D 1912 INDOOR BROODER

This brooder is designed to be used in dwellings, stables. poultry houses, etc. Is practically the same in all respects as the Style A 1912 Outdoor type, except that it is of more convenient shape for indoor use.

Price: Style D 1912 Indoor Brooder......\$11.50

Adaptable Hover

CYPHERS ADAPTABLE HOVER

IN ADDITION to this unequaled line of brooders, we offer separately the Cyphers Company's world's challenge ADAPT-ABLE HOVER. This machinery-made, all metal, guaran-ABLE HOVER. This machinery-made, all metal, guaranteed fire-proof heating and brooding device is SUITABLE TO BE USED ANYWHERE that heat is required for brooding chicks or ducklings. It can be used in a roosting coop, colony house, shed, hen house, barn or other building with or without any additional enclosure for the chicks, or in a large goods case or organ or piano box.

Price: Cyphers Adaptable Hover......\$8.50

CYCLE HATCHERS AND BROODER= **HATCHERS**

The demand for a machine to hatch eggs, by supplying artificial heat to them, caused the invention of the Cycle Hatcher, for the purpose of making a practical, simple, durable and

inexpensive hatcher.

THE CYCLE HATCHER is designed to take the place of the hen and the large clumsy incubators. The supply of heat the hen and the large clumsy incubators. The supply of heat in the Cycle Hatcher comes from the center and is radiated in all directions like the rays of the sun, carrying with it an abundant supply of fresh, heated air that is required to travel

Cycle Hatcher

only six inches to reach every egg in the extreme portions of the nest. The heat is governed by a double wafer regulator that is placed so close to the eggs that it is sensitive to the natural heat of the growing embryo chick in the egg as well as the supplied heat from the lamp.

Cycle Hatcher, capacity 50 eggs......\$6.50

Cycle Brooder=Hatcher

CYCLE BROODER=HATCHER

The Brooder-Hatcher is designed to do double duty and The Brooder-Hatcher is designed to do double duty and meet the requirements of all classes of poultry raisers, the one raising but a few chickens annually as well as the large breeders raising thousands. They have some advantages over our regular Hatchers for hatching, as they will stand a greater variation of temperature in the room in which they are operated, as the nest is protected by the brooder.

Cycle Brooder-Hatcher, capacity 50 eggs...\$8.50 Send for circular giving description of Cycle Hatchers and Cycle Brooder-Hatchers.

THE INTERNATIONAL SANITARY HOVER

This hover is constructed of heavy galvanized iron. It is a well known fact that wood hovers provide cracks for mites and other vermin and unquestion-

ably the sanitary is superior in that it can be easily cleaned and sprayed, so there can be no chance for vermin to live. It is very simple of construction, and very durable.

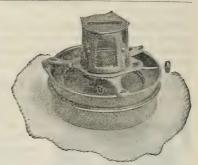

PRICE

Complete\$8.50. Send for circular, giving full description of this hover.

> **CYPHERS** SAFETY **BROODER**

> > STOVE

These stoves positively have no equal. They furnish twice as much heat as the ordinary brooder lamp. The safety water pan on the Cypners Safety Brooder Stove holds nearly a quart of water and extends out over the entire surface of the oil bowl, removing all danger of overneating the oil. Just the stove for use in home-made brooders. Height, 714 inches, greatest in home-made brooders. Height, 7½ inches; greatest width, 101/2 inches.

PRICE

Stove complete and ready for use

THE ECLIPSE LEG BAND

No. 1 for Bantams and small Mediterraneans. No. 2 for Mediterraneans. No. 3 for American females. No. 4 for American males, Asiatic females, small turkeys. No. 5 for Asiatic males and turkeys.

The band is light and neat and will stay on. They are so made that when properly adjusted they cannot come off. They are made from polished aluminum, and will not tarnish. Those who prefer a flat band will find them superior to anything on the market, while the price places them within the reach of everybody.

Prices: Postpaid, 15c per 12: 25c per 25; 45c per 50; 75c per 100.

DOUBLE CLINCH LEG BANDS

Made in polished aluminum and are provided with a strong and secure fastener. Made in five sizes. See table of sizes given under Eclipse Leg Bands.

Prices: Postpaid, 15c per 12; 25c per 25; 45c per 50; 75c per 100.

OVINAPTHOL LICE KILLING NEST EGG

Our Ovinapthol Lice Killing Nest Egg is a combined nest egg and lice killer. By simply using it in the nests in the same manner as an ordinary nest egg is used, laying hens are cleared of lice and mites and are able to occupy the nests with comfort. Being prepared with great care for this special purpose, they last a long time and always retain their effectiveness. The genuine nest eggs bear embossed on each egg the words, "Ovinapthol Nest Egg."

Prices: Each, 10c; per dozen, 75c.

Cyphers Dry Food Hopper and Sanitary Shell and Grit Box

Price 75 Cents

These are made of heavy galvanized iron, practically indestructible and will last a life-time with ordinary usage. They are practical labor and food saving de-

THE DRY FOOD HOP-PER has two compartments—alarge one for grain mixtures, holding about six quarts, and a small one for beef scrap, holding about three quarts.

THE SANITARY GRIT AND SHELL BOX has three compartments for grit, oyster shells and charcoal. Can be used for dry food hopper where a small flock is kept.

Price 50 Cents

"The Boston" Poultry Dry Feed Hopper

One of the most economical devices for feeding dry feed, beef scrap, etc.

The Boston Hopper-all sizes-hangs against the wall or can be placed on the floor or ground. The swinging grid or metal guard prevents the fowls from wasting the food. The Hopper can readily be "locked" at night (or in the day time) by simply hooking the grid to the front section at the lower end-thus making the device rat-proof.

Large Size. For dry feed. Holds 1/2 bushel....

CYPHERS ROUP CURE

This remedy is positively guaranteed by the manufacturers to cure roup in all its forms. It is simply put in water and the chick takes its own medicine. It prevents and cures cold and is unequaled for canker, especially in pigeons. No poultryman can afford to be without Cyphers Roup Cure.

PRICES

Small sample size....25 cents.

Medium size......50 cents.

DUNNING'S ROUP REMEDY

This roup remedy is administered to fowls in their drinking water. The fowls take their own medicine. This is almost the only method by which it is practical to cure roup. No poultryman can afford to be without this cure.

It is guaranteed to relieve roup when it is used according to directions, except where the fowls are in the last and incurable stages of the dis-

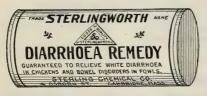

ease.

Prices: Package for 25 gallons of water, 50 cents, postpaid.

STERLINGWORTH DIARRHOEA REMEDY

A Certain and Guaranteed Remedy for Bowel Trouble and White Diarrhoea in Young
Chickens and Scours in Fowls and Pigeons

A positive cure and preventive for White Diarrhoea seems too good to be true for this scourge has driven more poultrymen out of business than any other disease. Millions of chickens die yearly from this trouble, which could be saved if Sterlingworth Diarrhoea Remedy was used. Poultrymen should not wait until their chickens become diseased, but should use it as a preventive. It does not stunt the chicks or cause them to stop growing, but aids It is used in the drinking water. The chickens and

them to become strong and healthy. fowl take their own medicine.

It is sold under a positive guarantee to give satisfaction or purchase price is refunded. Each package contains sufficient remedy for treating several flocks. Full directions on each package.

Price, per box, sufficient for several flocks, 50 cents.

CYPHERS LICE POWDER

In offering Cyphers Lice Powder we present a powder that we believe to be stronger than any other preparation sold for the purpose. It is carefully compounded and contains no chemicals that will injure the fertility of the eggs or prove dangerous to newly hatched chicks. It will positively kill

lice on poultry, cattle and horses; ticks on sheep and fleas on dogs.

PRICES
15 ounce package, 25c......postpaid, 40c
48 ounce package, 50c.....postpaid, \$1.00

STERLINGWORTH LICE POWDER

This is a scientifically compounded powder for killing all forms of insect life on fowls, and is equally good for destroying lice on cattle and horses, ticks on sheep and fleas on dogs. It is different from many of the so-called Lice Powders on the market, inasmuch as instead of driving the lice from the fowl's body, it kills them. While it is sure death to all kinds of insect life generally afflicting fowls and animals, it is harmless when used according to the plainly printed directions on each package.

PRICES

15 ounce package, 25c, postpaid, 40c 48 ounce package, 50c, postpaid, \$1.00

CYPHERS POULTRY FOODS

Owing to fluctuations in the grain market, it will be impossible for us to catalogue any prices on these goods. We shall have a good stock of them on hand and shall be pleased to quote prices at any time.

CYPHERS CHICK FOOD

This is a complete, scientifically compounded food for young chicks. It is a mixture of 11 different grains and seeds proportioned so as to meet all the needs of growing chicks, and to thoroughly nourish them. In compounding Cyphers Chick Food, the protein (or flesh and muscle forming element) is maintained high, the carbo-hydrates (or fat and heat forming elements) are reduced to their proper proportion and the ash (or mineral elements) is in sufficient amount to supply the needs of the rapidly growing bird. If chicks are to be developed into breeders, no other food is required for the first eight weeks.

Put up in 100-lb. bags. Price furnished on application.

Cyphers Developing Food

Cyphers Developing Food is a special food intended for properly maturing young chicks, after they are ready to be weaned from Chick Food, and to carry them along to the age when it is desirable to place before them the larger whole grains. When the chicks are from six to eight weeks old they are able to eat and exhibit a preference for larger particles of grain than are found in our Chick Food. Full directions for feeding are in every bag. Put up in 100-lb, sealed bags only, bearing manufacturer's trade-mark. Prices furnished on application.

Mealed Alfalfa

This is the best form of clover for use in mash food for small chicks, the meal being ground just coarse enough to give bulk to an otherwise soggy mash, and thus allowing the gastric juices to become mixed with the food and to assist in thoroughly digesting it. Mealed clover contains the entire food plant-nothing is removed.

Put up in 100-lb. bags. Prices furnished on application.

Short Cut Alfalfa

Guaranteed 95 per cent. Pure Alfalfa. Alfalfa possesses from 14 to 17 per cent. protein. Protein is the most valuable and most expensive element in all foods.
Put up in 100-lb, bags. Prices furnished on application.

Cyphers Forcing Food

The mash food specially designed to promote rapid growth. Put up in 100-lb. bags. Prices furnished on application.

Cyphers Scratching Food

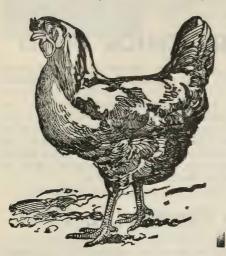

An ideal dry-grain mixture; affords variety and promotes exercise. Put up in 100-lb. bags. Prices furnished on application.

Cyphers Laying Food

A balanced ration, ready mixed for the daily mash. Put up in 100-lb. bags. Prices furnished on application.

GARANTOL

The Very Best and Cheapest Egg Preservative on the Market

Clean, fresh eggs properly preserved with Garantol keep fresh for a year and longer.

We have sold Garantol for a number of seasons. Out of all the people using it, we have not heard a complaint. Without an exception, they all claim that eggs preserved in Garantol are fully equal to fresh laid eggs.

Send for descriptive circular and testimonials.

Trial package, enough for 10 dozen eggs, 30 cents postpaid.

CYPHERS FULL-NEST EGG FOOD

A Meat Food Tonic Conditioner That Makes Hens Lay

Full-Nest Egg Food is the standard condition powder for all ages of poultry. Besides being an unexcelled egg producer, it is a concentrated meat food possessing tonic properties, which promote good health and fine condition. It stimulates and invigorates, but unlike other tonic foods, it also builds up the system and keeps it up. Many condition powders tone up the bird's system for a while, only to let it drop back as soon as the use of the tonic is discontinued. Full-Nest Egg Food will help your birds through their molt, make the feathers develop normally and induce a high state of perfection in plumage. Hens begin laying sooner after molting where this egg food is used. Full-Nest Egg Food contains no injurious drugs or chemicals; it is safe and easy to use.

"Victory" Lawn Mower

This machine has Ball Bearings of the very highest grade, which reduce the friction aston-ishingly and render it possible to use much wider machines than heretofore.

Triple gear entirely enclosed, so that no dirt or cut grass can find its way into the pinions and clog them.

The adjustments are the simplest, most perfect, and most positive.

These mowers are high speeded and have

a four-bladed reel, which leaves the lawn with		
a very smooth and velvety surface.

The Dunham Lawn Roller

The Only Lawn Roller With Roller Bearings

The Easiest Running Roller on the Market

The most essential tool for the care of a lawn is a roller. In the winter when the ground becomes frozen it expands, just as water does when it freezes. The thaw which follows the first warm days of spring allows the soil to settle back in its former position. But the sod, being much lighter than the soil, does not settle with the same rapidity. Large patches of grass roots in every lawn are thus left stranded in the air until after the growing season begins. The grass in these patches will die unless rolled down with a heavy roller as soon as the frost is out of the ground, so that the roots may again come into firm contact with the soil.

The proper use of a roller will make all the difference between a commonplace lawn and one of rare, velvety beauty.

FOREST PRUNING SAW

Polished steel frame, socket handle. This saw is designed for attachment to a pole or the socket can be used for a handle as desired.

Price (without pole).....\$1.50

Detroit Hand Pruning Saw

This is a bracket hand-pruning saw with blade so arranged as to be turned to any angle. This type of saw is most popular, because it is light, is capable of being used at any angle with practically no danger of breaking or buckling the saw.

Detroit Two Hand Pruner

This pruner is designed on scientific principles and is the result of long study and experimental work, very strong and durable. The blade positively will not cut or dig into the hook. The blade will not push the branch from between it and the hook. By dropping the hook considerably below the center line we have produced a positive draw cut superior to any other, with an opening between blade and hook allowing a straight thrust at the branch.

Price with 24-inch handle.....\$1.00

STANDARD TREE PRUNER

It does not crush the wood like the thick bladed shears.

It is the lightest device made for the purpose.

It will cut larger wood than any other device that is practical to handle.

It will clip the slightest twig on the extreme end of the limb.

It will reach higher than any other.

The for durability; cannot rust out. The glass reservoir is detachable and is patterned after the Mason fruit can, and is interchangeable with it, making it easy to replace in case of accident.

Price 50 Cents

"Iron Age" Combination Double and Single Wheel Hoe, Hill and Drill Seeder, No. 6

The frame of this tool is made of pipe coupled to malleable castings, thus combining great strength with lightness. It has high wheels and is very easy running.

It places the seed in continuous rows or in hills 4, 6, 8, 12 or 24 inches apart as desired.

Can be very quickly changed to a double or single wheel hoe.

Price \$12.00.

"Iron Age" Double or Single Wheel Hoe No. 1

This hoe has the same general construction of frame and wheels as the Number 6. It can be very quickly changed to a double or single wheel hoe. A great labor saver and very durable.

Price \$7.00.

New Universal Double Wheel Hoe Cultivator Plow and Rake No. 14

Specially Designed for Working Both Sides of the Row at One Passing

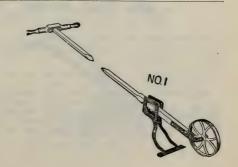

This new hand implement embraces all the good points of older efforts in the same line, and in addition offers new features which can not fail of appreciation. The special recommendation is the ADJUSTABLE ARCH, by which not only the depth of work can be gauged, but which, by an ingenious device, enables the teeth to be pitched at any angle desired.

There are nine adjustments of depth. The attachments are: 1 pair Hoes, 4 Cultivator Teeth, 1 pair Plows, 1 pair Rakes and 1 pair Vine or Leaf Guards. Price, \$5.50. Price, with noeing blades only, \$3.75. Send for Descriptive catalogue of the Universal Garden Tools.

Fuller's Unique Wheel Hoe No 1

For closely planted crops, as Beets, Carrots, Onions, etc., this hoe is without an equal and can be used the entire season. Having only one wheel it runs between the rows without bruising the tops, and having no frame work it does not tear the growing plants on either side. The great feature of this noe above all others is that it can be easily and quickly adjusted to any height or pitch desired by means of thumb nuts. The entire hoe weighs less than ten pounds and yet is a most practical tool. tical tool.

Price \$2.00

Matthews' New Universal Gem Seed Drill, No. 18

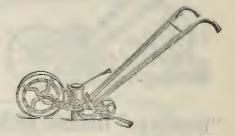

m of the demand for a low that the last the first sential qualities of the list the Seed Dial and Incurrent reing music from charty the same patterns.

Price \$5.25

Matthews' New Universal Garden Drill, No. 17

NONE BETTER CAN BE PRODUCED. Medals and testimonials confirming its superiority over all other drills have been repeatedly bestowed upon it from all quarters, and as it has been improved from time to time, it is now everywhere acknowledged to be THE MOST PERFECT DRILL MADE. It has been many years in use and its still increasing sale is the best evidence of its merits.

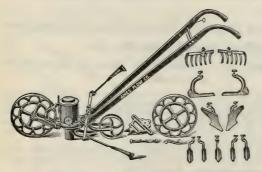

Price \$6.75

Matthews' New Universal "Hill and Drill" Seeder, No. 16

This Seeder is the same as the Garden Drill with the exception that it has pins in the wheel, which serve as a means for securing the various dropping distances of 4, 6, 8, 12, 16, 24 and 48 inches apart, as well as for sowing continuously in drills.

Matthews' New Universal Constellation Drill, No. 19

With Hoe, Cultivator, Plow and Rake Attachments.

This is the same as the Garden Drill, with cultivating attachments. It can be used either as a Double Wheel or Single Wheel machine and change can be readily made. We do not particularly recommend made. We do not particularly recommend a two-wheel seed sower, as the nicer work may be accomplished by a one-wheel machine. The two wheels are desirable, however, when used as a cultivator or wheel hoe, as in this way the rows of young plants may be straddled and the cultivating done on both sides of the rows at one passing.

Pr . 9 \$3,50

Matthews' New Universal Combined Hill and Drill Seeder, No. 22

With Cultivator, Rake and Plow Attachments. In this new implement there are combined

In this new implement there are combined all the features of the NO. 16 HILL AND DRILL SEEDER, with a HIGH STEEL ARCH WHEEL HOE.

The seeder will plant in drills or in hills varying from 4 to 48 inches apart.

The wheel hoe with the high steel arch allows the cultivation of plants 20 inches high, and has adjustable sides so that it can be expanded up to 20 inches in width and can be used as a single or double wheel one as deused as a single or double wheel noe, as desired.

Oliver Reversible Sulky Plow No. 23

The most complete and up-to-date Sulky Plow on the market.

The easiest to handle and safest to operate on hillside work.

By means of a "horse lift," which is brought into play by simply pressing forward slightly on the foot trip, the operator's work is diminished by fully onehalf and it is not necessary to lean way back in an uncomfortable and often unsafe position to use the hand lever. With this plow the operator can keep his eyes on his team and his hands on the reins, the feet only are needed in order to raise the plow.

Second only to this important improvement is the distribution of the plant of the plant

simple and easily operated tilting device connected with the seat of this sulky, which, when plowing along hillsides, while the machine is of course leaning down hill, makes it easy for the operator to keep a level seat and maintain the equilibrium of the plow.

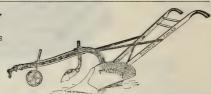

Send for Descriptive Circulars and Prices.

Syracuse New Potato Hoe

This hoe is much used in potato growing sections for hilling or covering. The willigs are of steel, so constructed that they will tilt up or down on the standard, and the standards are movable upon the crossbar, so that the wings can be placed the right distance apart. The crossbar is strengthened with iron braces, making a strong frame. The handles shift to right or left, so that operator can walk at the side of row.

PRICE \$6.00

The "Improved Bangor" Potato Hoe

This hoe is especially adapted as a potato, cornor covery hiller, or as a coverer. Wings are polished that and the desired distance apart by moving standards and the desired distance apart by moving standards are out mon the crossbar. The wings are wo parts so that the end or tail of the can he dropped down and thus work the earth under the tops, instead of burying them. The crossbar is strengthened with iron braces, which connect it with the pole making a strong and durable

PRICE \$6.00

Improved Disc Potato Hoe

A very easy working type of hoe, and considered by many to be superior to all others for covering and hilling.

It is fitted with 20-inch discs, which can be easily adjusted to any angle.

Price \$8.50.

Barrel Header

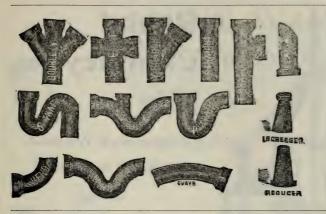

This is the most simple, labor-saving machine ever invented for heading up barrels and is used extensively for heading up apples, fish and other merchandise.

1-inch Iron Screw (attached follower)\$1.25

Wright's Animal Tether

This device is designed to obviate the danger of horses and other animals becoming entangled in the rope with which they are fastened. It consists of a pole about ten feet in length, connected with an upright bar, upon which it turns in any direction. The animal is fastened to the end of this pole by a rope, which is kept Alici Wacillik Co. Alici Wass. 1184 taut above his head by means of a spring at the base of the pole; this keeps the pole high in the air until in reaching for the feed the animal pulls it down, thus at all times keeping the rope from under his feet. Price \$3.00

CHAMPION MILK COOLER AND AERATOR

This is a perfect Aerator, removing flavors arising from excessive cabbage, turnip or silo rations.

It is a complete Deodorizer, removing the animal heat or cowy taste and all odors arising from the absorption by the milk of stable or other unpleasant gases.

It is a thorough Cooler, reducing the temperature of the milk in one minute nearly to the temperature of the cooling medium.

It is equally well adapted to the use of any cooling medium, either running water, or ice water.

Every farmer or milkman handling milk cannot afford to be without one.

Buckley's Patent Watering Device

FOR WATERING STOCK IN STABLE

Water in the stable is a necessity for the proper caring of the stock; it should be of suitable temperature, and the stock should have constant access to it.

This is the most practical and economical device for watering cattle in the stable. The

This is the most practical and economical device for watering cattle in the stable. The iron basins can be kept clean much easier than any form of wooden troughs and there is nothing to wear or rot out. The check valve at the bottom of each basin prevents clogging of pipes because no hay, meal or other substances can be drawn into them. It also greatly prevents the spread of contagious disease, as the supply of each basin is drawn directly from the main reservoir. Water from a spring or reservoir is piped into a small tank, and the level of water in the basin is contralled automatically have a fleet valve on an overflow in this tank.

basins is controlled automatically by a float valve on an overflow in this tank.

With Balance Wheel and Separator. This corn sheller is especially designed to

meet the wants of the farmer.

The materials used in construction are selected for the purpose, and shellers are made and finished in a thorough manner.

It has a capacity of from 20 to 25 bushels per hour.

The balance wheel is on the outside of the

machine and adds momentum to it. The separator separates the shelled corn

from the cobs without breaking the cobs.

PRICE

Style A, with balance wheel and separator\$8.50

Yankee Corn Sheller STYLE P

This is the best and most popular corn sheller made. Made largely of malleable iron and very easily adjusted. Can be fastened to any box securely and quickly. securely and quickly. Will shell perfectly clean and always throw out cobs. Can be easily run by a child.

PRICE

Style P\$2.50.

Wine and Lard Presses

No. 2\$6.00.

TACKLE BLOCKS

We carry a full line of blocks, both in Common Iron Bushed and in the Patent Roller Bushed Sheaves.

Write for Prices.

HYDRATED LIME

This Lime is specially prepared for use in making Bordeaux Mixture and is being exten-

sively used for that purpose.

Much better results may be obtained from the use of this lime than from the ordinary lime, from the fact that no further slaking or screening is necessary, hence clogging of the sprayer is overcome by its use.

The following has been found to be the most satisfactory formula for making Bordeaux Mixture: Six pounds prepared lime, five pounds copper sulphate and 50 gallons of water.

Lion Brand Bordeaux Mixture

This mixture is a scientific preparation and combined in a manner heretofore unknown, thus enabling the manufacturer to place it on the market in a practical and usable shape, as by simply adding water and stirring, it is ready for use.

One galion will make 50 gallons by the addition of 49 gallons of water. Actual cost to you when ready for use 2 cents per gallon.

It Prevents Potato Rot, Potato Blight, Downy Mildew and Anthracnose of Grape, Peach, Pear and Cherry Blight, Etc.

1 Gallon Can, \$1.00.

1 Quart Can, 40 cents.

Lion Brand Powdered Hellebore Strictly Pure

For destroying Rose Slugs, Currant Worms and Insects on Berries, Bushes, Plants, Shrubs, etc.

1-lb. Package, 30c. 1/2-lb. Package, 17c. 1/4-lb. Package, 10c. If sent by mail, 16 cents per pound extra.

Sherwin=Williams Strictly Pure Paris Green

For destroying Potato Bugs., etc. In one pound boxes. We also carry a good stock of Raynold's Paris Green. Write for Prices.

This is a standard brand of grafting war and is highly recommended by all who have used it. Put up in convenient packages of 1-lb., ½-lb. and ¼-lb. 1-lb. package, 25c.; ½-lb. package, 15c.; ¼-lb. package, 10c. If sent by mail, 16 cents per pound extra.

COPPER SULPHATE

For Making Bordeaux Mixture. Write for Price.

WHALE OIL SOAP

Makes an excellent wash for Trees, Rose Bushes and Plants, destroys insects and their eggs. Price Per Pound, 15 Cents.

BUG DEATH

Pat March 16 and Nov. 9, 1897. Pat. in Canada Nov. 2, 1897.

This Insecticide and Plant Food Combined has been on the market for fourteen years and its sales have shown a large increase each year. We can say to our customers that we give Bug Death our fullest endorsement. While the first cost to kill the bugs on an acre of potatoes is rather more than the arsenical insecticides, the results at harvesting time are entirely satisfactory, and where practical tests have been made, the extra yield of marketable potatoes has more than paid the entire expense. It is non-poisonous, which makes it perfectly safe to use on all plants or vines.

Very Beneficial Results are obtained by using Bordeaux Mixture in connection with Bug Death, and they can be mixed and sprayed on the vines at the same time, with any of the spraying machines on the market for that purpose. Bug Death prevents blight. Use Bug Death for your fruit trees. It kills the insect pests, protects the trees, promotes their vicorous growth, gives freedom to the bees and insures quality and quantity of fruit.

Bug Death kills the potato, squash and cucumber bug, current and tomato worm, also other plant and vine eating pests.

Dickey Duster

IF USED DRY

Apply with Dickey Bug Death Duster or a cloth bag of right mesh; 12½ to 25 lbs. per acre per application. The more freely used the better the plant will thrive. Dust plant evenly and thoroughly.

PRICE LIST

One Pound Package\$.15.	Twelve and One-half Pound Package, \$1.00.
Three Pound Package \$.35.	One Hundred Pound Package\$7.50.
Five Pound Package\$.50.	Dickey Duster\$.25.
Send for Circular giving full directions for	using Bug Death.

Cooper's Sheep Dipping Powder

The best known preparation for destroying ticks on sheep, stopping the fly, preventing and curing the scab, promoting the growth of wool and improving the appearance and condition of the flock.

Will make 25 gallons of wash.

Sherwin=Williams Lime Sulphur Solution

This solution is the result of much experimenting and is ideal for the use of horticulturists. It is a clear, sparkling, cherry-colored liquid, which is made from the very highest grades of lime and sulphur. It is absolutely free from sediment, and in air-tight containers will keep for an indefinite period.

Prices on application.

SHERWIN-WILLIAMS NEW PROCESS ARSENATE OF LEAD

(IN PASTE FORM)

Sherwin-Williams New Process Arsenate of Lead has many advantages over all other arsenical insecticides. It has an advantage over Paris Green, in that it remains in suspension when prepared for use for a longer time and because of its adhesiveness it will stick to the foliage for the longest possible time. It is absolutely harmless to foliage, and as it contains practically no water soluble arsenic, it is the only material of this character that can be applied with safety at the proper strength to the foliage of peach trees.

Arsenate of Lead should be used in proportions varying from one to six pounds of Arsenate of Lead to 50 gallons of water, the quantity of poison being dependent upon the particular leaf-eating insect that it is desired to destroy.

Put up in 1-lb. glass jars; 5-lb., $12\frac{1}{2}$ -lb., 25-lb. and 50-lb. wood pails and 100-lb. wood kegs.

Write for prices.

FLOUR OF SULPHUR Used to prevent mildew in grape vines, plants, etc. Valuable to use about the stable and poultry house. Price, per pound, 5 cents; per 100 lbs.....

SULPHO-TOBACCO SOAP

A Wonderful an inexpensive Insecticide

Sulpho-Tobacco Soap is a powerful agent for the destruction of all bugs and insects. One or two applications will rid plants of the pests. Full directions with each cake.

Destroys cabbage-, squash- and potato-bugs, currantworms, lice, green-fly, mealy bug, red spider, etc. Sure death to all plant insects indoors and out-of-doors. Of special value for spraying shrubs, fruit-trees and vines.

3=oz. Cake makes $1\frac{1}{2}$ gallons prepared solution. 10 cents. Mailed, postpaid, for 13 cents.

8=oz. Cake makes 4 gallons prepared solution. 20 cents. Mailed, postpaid, for 28 cents.

10-ib. Cake makes 80 gallons prepared solution. By Ex-press, \$3.00.

Free with every order, "The Window Garden," abooklet by Eben E. Rexford, giving valuable information on the cultivation of plants and the extermination of insects.

KNOX=EM=ALL

FLY OIL. THE BEST THING ON THE MARKET

For ridding Horses and Cattle of flies and all insect pests. And Poultry of lice and mites. Gad flies will not work on Sheep and they will not have Grub in the head. Inoffensive and harmless to persons and stock. Deadly

Cows give more milk and pay \$8 to \$10 per bead more during the season at a cost of pour 50 cents per cow. It can be used on horses without gramming or otherwise injuring about 50 cents per cow. It can be used on horses without gumming or otherwise injuring the hair, and affords instant relief, making them thrive and drive better.

Directions:—For flies apply freely with a good sprayer. For lice spray the roosts, nests, and all places where vermin find lodgment, including the poultry when on the roosts.

Price, per gallon, 60 Cents

WATERING TROUGHS

These Watering Troughs are made of 2-inch selected White Pine, 2 feet wide, 2 feet high, outside measure. They are perfectly tight and very durable. They are the cheapest and best style of Watering Troughs on the market. Made in any length.

Price, \$1.50 per foot in length.

Cow Tail Holder and Milk Protector

A necessity to every progressive dairyman, who wants to keep his clothes and milk clean, as the tail is held by the patent spring that allows no switching of the tail.

It is made of spring steel and copper and will last a life-time.

By pressing on the clamp, it is easily adjusted, as well as released, and always ready for use, as it is attached to the ceiling one foot back of the cow by a two-foot chain, and cannot be carried out into the pasture by the cow.

Price, postpaid10 cents each.

Send for our catalogue on pumps and water supplies.

PUMP LEATHERS

We carry a complete line of leathers for all styles of pumps.

PUMPS

BARNES "JUPITER" DOUBLE-ACTING FORCE PUMP

With Reversible Air Chamber and Malleable Iron Lever.

Fig. 13A shows our New Improved "Jupiter" Double-Acting Force Pump, which is especially adapted for elevating water from cisterns to tanks in upper steries of residences, and is much more reliable than any water motor ever made, as it can be depended upon at all times. It is also used largely for cleaning and filling boilers and for fire protection, or can be used as a deck pump and many other purposes. All sizes fitted with our New Improved Brass Valves. Brass plugs are provided for draining cylinder to prevent freezing, and also for priming when necessary. 'The air chamber can be reversed so that discharge may be used on either side. The suction and discharge are always fitted for iron pipe unless otherwise ordered, but can be fitted for hose or lead pipe if specified.

All Brass Pumps, for pumping acids, furnished to order.

PLUMBERS' FORCE PUMP

Fig. 14A represents a very effective force pump, weighing only about eight pounds. It can be carried about anywhere without the least difficulty. It is adapted for spraying fruit trees, washing windows, wagons, sprinkling lawns, conservatories, gardens, and for incipient fires. With each pump is sent suction and discharge hose connected, so that it requires no labor to put in immediate operation. Longer length of hose can be furnished, if desired. Pump has brass cylinder, plunger and rod.

Brass Lined

Fig. 14A

PUMPS

BARNES EXTRA HEAVY STOCK PUMP

With Wrought Iron Set Lengths. Anti-Freezing. Open Top.

Fig. 18A

Fig. 18A represents our New Improved Heavy Lift Pump, which is especially adapted for stock purposes where large quantities of water are required from shallow wells. The handle is extra long and all parts of the pump are extra heavy. The spout has full 2-inch opening and the chamber or reservoir is large, thus causing practically a steady flow of water. The size of the plunger rod is ½-inch. It is built throughout to stand heavy service. All parts are lettered and numbered, thus avoiding errors in ordering repairs.

Double Grooved Foundation Fastening Hoffman Self-Spacing Brood Frames

As thick-top frames, practically prevent the building of burr combs, frames with a thick top bar are almost universally used. The top bar is %-in, thick and 1½-in, wide. The top bar is made with a double groove on the under side. One of the grooves is fitted with a bevel strip which presses the thin piece between the grooves against the foundation holding it perfectly straight and exactly in the center of the top bar. To put in foundation, insert edge in the groove in center of top bar, slip in the wedge in other groove and tack in place with two or three small wire nails.

Prices not set up

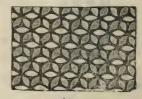

Per lot of 10.......\$.40. Per lot of 100......\$3.25.

COMB FOUNDATION

This foundation is made from the best grade of pure beeswax and before being made into foundation is entirely cleansed of all foreign substances.

PRICES

Standard Brood...58c per lb. Light Section...65c per lb. If foundation is wanted by mail, add 25 cents per pound for postage.

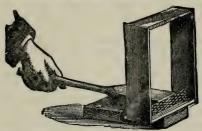

BEE KEEPERS' SUPPLIES

GLOBE BEE VEIL

Has five cross bars riveted through the center at the top. These button to study on the neckband. The bars are light spring steel, the neckband is of hard spring brass and the cover is of handsome, light material. It is very easily put together—no trouble to put on or take off. It protects against mosquitoes, these, bees, gnats, etc. The veil weighs only five ounces. Price, \$1.00.

Parker's Machine for Fastening Starters in Section Boxes

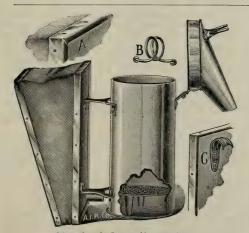

Fasten machine to table with screws that are sent with it. Dampen the underside of point of lever with honey or water to prevent its sticking to the foundation. Place section in position with strip of foundation just under the end of lever; press lever down on foundation by lifting handle, turn foundation up against end of lever and slide lever off of foundation by lifting on handle and drawing it backward, which fastens the foundation to section.

PAGE FEEDER

One of the best feeders for feeding over the brood nest. It is made from a solid block of wood and is covered with wire cloth. It has a bee space under bottom and also at top between wire cloth and top of partitions. Bees cannot escape while feeder is being filled. A small hole cut in mat and feeder set over same will be found a convenient way of using it, but it can be used in many ways.

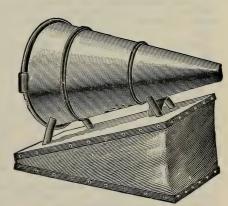

Each nailed up complete, 40c.; by mail, 65c.

Standard Corneil Smoker

Price, 90c each. By mail, \$1.15 each.
